120 l from model EN 840-1

Refuse disposal and waste collection container

- Bin made of HDPE in an injection moulding process
- Solid, sturdy shape, resists warping, knocks and decay
- Weatherproof, (UV) sun proof
- Frost and heat resistant, also withstands many chemicals
- Solid rubber tyres (Ø 200x50 mm)
- Non-corrosive metal parts
- Recyclable

A new generation of containers from EUROPLAST

New developments in waste disposal technology for front, rear and side loaders, as well as ever increasing speeds, will make our business partners more competitive. It was our aim to develop a container today that would meet the needs and demands of future waste disposal generations tomorrow. To achieve this, load-bearing levels were determined by way of readings and computer simulations. Our answer and contribution to the safeguarding of our costumers in the future are the reinforced container base, plus the unique double-ridged strip with an integrated cushioning systems.

Accessories

- Special disposal openings
- Various shutting systems
- Various kinds of labelling
